Practice Quiz: Exploring Chroma DB
Practice Assignment • 10 min

Due Aug 22, 11:59 PM IST

Your grade: 100%

Your latest: **100%** • Your highest: **100%** • To pass you need at least 60%. We keep your highest score.

---

1. Which approach is fundamental to working with Chroma DB? 1 / 1 point

○ Writing SQL queries for data manipulation
● Utilizing vector embeddings for data representation
○ Implementing RESTful APIs for data interaction
○ Storing all data in JSON format

✓ Nice work

Correct! Chroma DB is designed to store and search vector embeddings, which are essential for tasks like semantic search and AI applications.

2. What is the primary algorithm used by Chroma DB for approximate nearest neighbor (ANN) search? 1 / 1 point

○ Decision Trees
○ K-Means Clustering
● Hierarchical Navigable Small World (HNSW)
○ Linear Regression

✓ Nice work

HNSW is the core algorithm used by Chroma DB for fast and scalable approximate nearest neighbor searches.

3. Which of the following best describes metadata filtering in Chroma DB? 1 / 1 point

○ Filtering based on vector similarity scores.
● Filtering based on structured attributes such as tags or timestamps.
○ Filtering based on the presence of specific words in document content.
○ Filtering using SQL-like joins between collections.

✓ Nice work

Metadata filtering targets structured attributes such as tags, topics, or timestamps.

4. What is the default distance metric used by Chroma DB for similarity search? 1 / 1 point

○ Manhattan distance
● Euclidean distance
○ Dot product
○ Jaccard similarity

✓ Nice work

Euclidean (L2) distance is the default metric used by Chroma DB.

5. Which of the following best describes document filtering in Chroma DB? 1 / 1 point

○ Filtering based on vector similarity scores.
○ Filtering based on collection names.
○ Filtering based on structured metadata such as tags or timestamps.
● Filtering based on keyword presence in the document content.

✓ Nice work

Document filtering uses operators such as $contains to search within document text.
