

- Course Introduction
- AI and Generative AI Professional Certificate
- Overview
- Course Overview
- Reading: 4 min
- What AI Is for Course Completion

- Optional: Generative AI Essentials
 - About This Optional Lesson
 - Introduction to Generative AI
 - What are Generative AI Models?
 - Video: What is NLP (Natural Language Processing)?
 - Reading: Comprehensive Guide to Generative AI
 - Practice Quiz: Generative AI Course Quiz

- Working with Prompt Engineering and Prompt Templates
 - Introduction to Prompt Learning
 - Introduction to LangChain
 - Advanced Methods of Prompt Engineering
 - LangChain LLM Chaining Method
 - Optional Reading: What is Prompt Engineering, and Why You Need It?
 - Choosing the Right Prompt Strategy: A Pro Lab Assistant Checks
 - Lab: Master Prompt Engineering and LangChain
 - Practice Quiz: Working with Prompt Engineering and Prompt Templates

- Module Summary and Evaluation
 - Summary and Insights: Foundations of Generative AI and Prompt Engineering
 - Check Your: Foundations of Generative AI and LangChain
 - Graded Quiz: Foundations of Generative AI and Prompt Engineering

- Module 2
 - Introduction to LangChain in Generative AI Applications

- Module 3
 - Build a Generative AI Application with LangChain

About this Optional Lesson

This short lesson introduces the basics of Generative AI that are required as background for this and other courses in the program. If you are already familiar with GenAI fundamentals, feel free to skip ahead to the next lesson. Or, if you require a review in depth training in GenAI, we encourage you to complete the following course:

- Generative AI: Introduction and Fundamentals
- Generative AI: Prompt Engineering Essentials
- Generative AI: Foundation Models and Evaluation

Mark as completed
