Put It to Work: Prepare for Cybersecurity Jobs

Module 1
Protect data and communicate incidents

Get started with the course
- Introduction to Course 8 — Video • 2 min
- Course 8 overview — Reading • 4 min
- Dion: My personal career journey — Video • 2 min
- Helpful resources and tips — Reading • 4 min

Event and incident detection
- Welcome to module 1 — Video • 39 sec
- Analyze event logs with NotebookLM — Practice Assignment • 20 min
- Security as a mindset — Video • 2 min
- Data and asset classification — Reading • 4 min
- Explore: Asset protection — Ungraded Plugin • 10 min
- Test your knowledge: Event and incident detection — Practice Assignment • 8 min

Your impact on data protection
- Detect and protect without neglect — Video • 3 min
- Disaster recovery and business continuity — Reading • 4 min
- Juliana's story: Asset protection — Reading • 4 min
- Test your knowledge: Your impact on data protection — Practice Assignment • 8 min

Review: Protect assets and communicate incidents
- Wrap-up — Video • 1 min
- Glossary terms from module 1 — Reading • 4 min
- Module 1 challenge — Graded Assignment • 50 min

Module 2
Escalate incidents

Module 3
Communicate effectively to influence stakeholders

Module 4
Engage with the cybersecurity community

Module 5
Use AI to optimize workflows

Helpful resources and tips

0:05 / 6:57 1x

As a learner, you can choose to complete one or multiple courses in this program. However, to obtain the Google Cybersecurity Certificate, you must complete all the courses. This reading describes what is required to obtain a certificate and best practices for you to have a good learning experience on Coursera.

Obtain the Google Cybersecurity Certificate

To receive your official Google Cybersecurity Certificate, you must:

- Pass all graded assignments in all 9 courses of the certificate program. Each graded assignment is part of a cumulative graded score for the course, and the passing grade for each course is 80%.

AND **one** of the following:

- Pay the course certificate fee,
- Be approved for Coursera Financial Aid, **or**
- Complete the certificate through an educational institution, employer, or agency that's sponsoring your participation.

Healthy habits for course completion

Here is a list of best practices that will help you complete the courses in the program in a timely manner:

- **Plan your time:** Setting regular study times and following them each week can help you make learning a part of your routine. Use a calendar or timetable to create a schedule, and list what you plan to do each day in order to set achievable goals. Find a space that allows you to focus when you watch the videos, review the readings, and complete the activities.
- **Work at your own pace:** Everyone learns differently, so this program has been designed to let you work at your own pace. Although your personalized deadlines start when you enroll, feel free to move through the program at the speed that works best for you. There is no penalty for late assignments; to earn your certificate, all you have to do is complete all of the work. You can extend your deadlines at any time by going to **Overview** in the navigation panel and selecting **Switch Sessions**. If you have already missed previous deadlines, select **Reset my deadlines** instead.
- **Be curious:** If you find an idea that gets you excited, act on it! Enrich your learning experience with **Gemini's Guided Learning feature**. It acts as your personal learning assistant, helping you ask insightful questions, find more details online, and explore interesting topics. The steps you take to support your learning along the way will advance your knowledge, create more opportunities in this high-growth field, and help you qualify for jobs.
- **Take notes:** Notes will help you remember important information in the future, especially as you're preparing to enter a new job field. In addition, taking notes is an effective way to make connections between topics and gain a better understanding of those topics.
- **Review exemplars:** Exemplars are completed assignments that fully meet an activity's criteria. Many activities in this program have exemplars for you to validate your work or check for errors. Although there are often many ways to complete an assignment, exemplars offer guidance and inspiration about how to complete the activity.
- **Build your career identity**: Your career identity is the unique value you bring to the workforce. Watch this video to learn about the key components of career identity and write your own career identity statement. Discovering and defining your own career identity makes you better equipped to choose a career path that aligns with your strengths, values, and goals and is more effective in your chosen profession.
- **Connect with other learners**: If you have a question, chances are, you're not alone. Visit Coursera's private Google Cybersecurity Community to expand your network, discuss career journeys, and share experiences. Check out the quick start guide.
- **Update your profile:** Consider updating your profile on Coursera with your photo, career goals, and more. When other learners find you in the Community, they can click on your name to access your profile and get to know you better.

Documents, spreadsheets, presentations, and labs for course activities

To complete certain activities in the program, you will need to use digital documents, spreadsheets, presentations, and/or labs. Security professionals use these software tools to collaborate within their teams and organizations. If you need more information about using a particular tool, refer to these resources:

- Microsoft Word: Help and learning: Microsoft Support page for Word
- Google Docs: Help Center page for Google Docs
- Microsoft Excel: Help and learning: Microsoft Support page for Excel
- Google Sheets: Help Center page for Google Sheets
- Microsoft PowerPoint: Help and learning: Microsoft Support page for PowerPoint
- How to use Google Slides: Help Center page for Google Slides
- Common problems with labs: Troubleshooting help for Qwiklabs activities

Module, course, and certificate glossaries

This program covers a lot of terms and concepts, some of which you may already know and some of which may be unfamiliar to you. To review terms and help you prepare for graded quizzes, refer to the following glossaries:

- **Module glossaries**: At the end of each module's content, you can review a glossary of terms from that module. Each module's glossary builds upon the terms from the previous modules in that course. The module glossaries are not downloadable; however, all of the terms and definitions are included in the course and certificate glossaries, which are downloadable.
- **Course glossaries**: At the end of each course, you can access and download a glossary that covers all of the terms in that course.
- **Certificate glossary**: The certificate glossary includes all of the terms in the entire certificate program and is a helpful resource that you can reference throughout the program or at any time in the future.

You can access and download the certificate glossaries and save them on your computer. You can always find the course and certificate glossaries through the course's Resources section. To access the **Cybersecurity Certificate glossary**, click the link below and select *Use Template*.

Course feedback

Providing feedback on videos, readings, and other materials is easy. With the resource open in your browser, you can find the thumbs-up and thumbs-down symbols.

- Click **thumbs-up** for materials that are helpful.
- Click **thumbs-down** for materials that are not helpful.

If you want to flag a specific issue with an item, click the flag icon, select a category, and enter an explanation in the text box. This feedback goes back to the course development team and isn't visible to other learners. All feedback received helps to create even better certificate programs in the future.

For technical help, visit the Learner Help Center.
