1. **Fill in the blank: A malware infection is an incident type that occurs when _____.** 1 / 1 point

● malicious software designed to disrupt a system infiltrates an organization's computers or network
○ a computer's speed and performance improves
○ a website experiences high traffic volumes
○ an employee of an organization violates the organization's acceptable use policies

✓ **Nice work**

A malware infection is an incident type that occurs when malicious software designed to disrupt a system infiltrates an organization's computers or network.

2. **Fill in the blank: Improper usage is an incident type that occurs when _____.** 1 / 1 point

● an employee of an organization violates the organization's acceptable use policies
○ an employee that runs an organization's public relations posts incorrect data on the company's social media page
○ malicious software designed to disrupt a system infiltrates an organization's computers or network.
○ an individual gains digital or physical access to a system or application without permission

✓ **Nice work**

Improper usage is an incident type that occurs when an employee of an organization violates the organization's acceptable use policies.

3. **When should you escalate improper usage to a supervisor?** 1 / 1 point

○ Improper usage incidents should be escalated if there is a high level of improper usage.
● Improper usage incidents should always be escalated out of caution.
○ Improper usage attempts that affect high-priority assets should be escalated; other improper usage instances are not as important.
○ Improper usage does not need to be escalated because these are in-house scenarios that can be handled without reporting them to the security team.

✓ **Nice work**

Improper usage should always be escalated.

4. **Fill in the blank: Unauthorized access is an incident type that occurs when _____.** 1 / 1 point

● an individual gains digital or physical access to a system, data, or an application without permission
○ an employee of an organization violates the organization's acceptable use policies
○ malicious software designed to disrupt a system infiltrates an organization's computers or network
○ an authorized employee sends a job description to a friend before the job description has been released to the public

✓ **Nice work**

Unauthorized access is an incident type that occurs when an individual gains digital or physical access to a system, data, or an application without permission.
