

Foundations of Cybersecurity

Module 1
Welcome to the exciting world of cybersecurity

Module 2
The evolution of cybersecurity

Module 3
Protect against threats, risks, and vulnerabilities

Module 4
Cybersecurity tools and programming languages

Important cybersecurity tools

- Welcome to module 4
 - Video • 3 min
- Connect cybersecurity tools
 - Video • 4 min
- Tools for protecting business operations
 - Reading • 12 min
- Explore Tools and their purposes
 - Ungraded Quiz • 10 min
- Test your knowledge: Important cybersecurity tools
 - Practice Assignment • Grade: 100%

Core cybersecurity knowledge and skills

- Introduction to Linux, SQL, and Python
 - Video • 3 min
- Use tools to protect business operations
 - Reading • 12 min
- Test your knowledge: Core cybersecurity knowledge and skills
 - Practice Assignment • Grade: 100%
- Create a cybersecurity portfolio
 - Reading • 12 min
- Portfolio Activity: Draft a professional statement
 - Graded Assignment • Grade: 100%
- Portfolio Activity: Generate Draft a professional statement
 - Reading • 4 min

Review Cybersecurity tools and programming languages

- Cyber Dialogue: Explore entry-level security analyst responsibilities
 - Reading • 12 min
- Wrap-up
 - Video • 42 sec
- Glossary terms from module 4
 - Reading • 1 min
- Module 4 challenge
 - Graded Assignment • Grade: 98.12%

Congratulations on completing Course 1!

- Join the community
 - Reading • 4 min
- Course wrap-up
 - Video • 3 min
- Course Glossary
 - Reading • 2 min
- Get started on the next course
 - Reading • 4 min

1x

Congratulations on completing Course 1 of the Google Cybersecurity Certificate: **Foundations of Cybersecurity**! In this part of the program, you learned about possible career paths and key skills for cybersecurity professionals. You were also introduced to foundational cybersecurity terms and concepts that you will continue to explore throughout the certificate program.

The Google Cybersecurity Certificate has eight courses:

Foundations of Cybersecurity

Play It Safe: Manage Security Risks

Connect and Protect: Networks and Network Security

Tools of the Trade: Linux and SQL

Assets, Threats, and Vulnerabilities

Sound the Alarm: Detection and Response

Automate Cybersecurity Tasks with Python

Put It to Work: Prepare for Cybersecurity Jobs

Accelerate Your Job Search with AI

- Foundations of Cybersecurity** – Explore the cybersecurity profession, including significant events that led to the development of the cybersecurity field and its continued importance to organizational operations. Learn about entry-level cybersecurity roles and responsibilities. (This is the course you just completed. [Red dot])
- Play It Safe: Manage Security Risks** – Identify how cybersecurity professionals use frameworks and controls to protect business operations, and explore common cybersecurity tools.
- Connect and Protect: Networks and Network Security** – Gain an understanding of network-level vulnerabilities and how to secure networks.
- Tools of the Trade: Linux and SQL** – Explore foundational computing skills, including communicating with the Linux operating system through the command line and querying databases with SQL.
- Assets, Threats, and Vulnerabilities** – Learn about the importance of security controls and developing a threat actor mindset to protect and defend an organization's assets from various threats, risks, and vulnerabilities.
- Sound the Alarm: Detection and Response** – Understand the incident response lifecycle and practice using tools to detect and respond to cybersecurity incidents.
- Automate Cybersecurity Tasks with Python** – Explore the Python programming language and write code to automate cybersecurity tasks.
- Put It to Work: Prepare for Cybersecurity Jobs** – Learn about incident classification, escalation, and ways to communicate with stakeholders. This course closes out the program with tips on how to engage with the cybersecurity community and prepare for your job search.
- Accelerate Your Job Search with AI** – Gain practical job search strategies and learn how to leverage AI tools like Gemini and NotebookLM to answer your most valuable skills, create a job search plan, manage your applications, and practice for interviews as you navigate your path to your next role.

Now that you have completed this course, you are ready to move on to the next course: [Play It Safe: Manage Security Risks](#).

Keep up the great work!

coach

Hi, Venkatesh!

How can I help?

Explain this topic in simple terms

Give me a summary

Give me practice questions

Give me real-life examples

Ask me anything
