

[Back](#) Quiz: Infrastructure Automation

See Apr 21, 2019 07:07

Your grade: 100%
You scored 100% • You targeted 100% • To pass you need at least 80%. We keep your highest score.

Total items: 18

1. What's the benefit of writing templates for your Terraform configuration?

1 / 1 point

- ☐ Allow you to template properties for your resources
- ☐ Allow you to use configuration management software
- ☐ Allow you to abstract part of your configuration into individual building blocks that you can reuse
- ☒ Correct
Correct: After you create a template, you can reuse them across deployments as necessary. Similarly, if you find yourself creating configurations that share very similar properties, you can abstract the shared parts into templates.

2. What does Google Cloud Marketplace offer?

1 / 1 point

- ☐ A centralized billing platform for all Google Cloud services and applications
- ☐ Production-grade solutions from third-party vendors who have already created their own deployment configurations based on Terraform
- ☐ A platform for trading VM instances
- ☒ Correct
Correct: Google Cloud Marketplace offers production-grade solutions from third-party vendors who have already created their own deployment configurations based on Terraform.
