1. Which of the following statements accurately describe operating systems? Select all that apply.

1 / 1 point

- ☐ Computers have operating systems, but smartphones and tablets do not have them.
- ☒ Operating systems are responsible for making computers run efficiently.

Correct

- ☐ Operating systems are a type of computer hardware.
- ☒ Operating systems help people and computers communicate.

Correct

2. Which of the following operating systems were designed to run on mobile devices? Select two answers.

1 / 1 point

- ☐ Linux
- ☒ iOS

Correct

- ☐ macOS®
- ☒ Android

Correct

3. What components are involved in the booting process? Select two answers.

1 / 1 point

- ☐ A CLI
- ☐ A GUI
- ☒ The bootloader

Correct

- ☒ BIOS or UEFI

Correct

4. Fill in the blank: When someone uses a computer application, the operating system interprets the user's requests and directs them to the appropriate ____.

1 / 1 point

- ☐ user interface
- ☒ components of the computers hardware
- ☐ applications
- ☐ user on the system

Correct

5. If you wanted to download a file from an internet browser, which of these things would happen? Select three answers.

1 / 1 point

- ☒ The application would communicate the request to the operating system.

Correct

- ☐ The application would communicate directly with hardware to download the file.
- ☒ You would initiate the task by clicking the download button in the application.

Correct

- ☒ The operating system would communicate with hardware to download the file.

Correct

6. Which of the following are key types of user interfaces? Select two answers.

1 / 1 point

- ☒ Graphical

Correct

- ☐ Mobile
- ☒ Command line

Correct

- ☐ System

7. Which of the following statements correctly describe GUIs and CLIs? Select three answers.

1 / 1 point

- ☒ GUI icons help users manage different tasks on a computer.

Correct

- ☒ A CLI uses commands to communicate with an operating system.

Correct

- ☒ A CLI can complete multiple tasks efficiently.

Correct

- ☐ A GUI is a text-based user interface.

8. A security team suspects that an attacker has compromised their system. They examine the commands entered by the attacker to determine whether they can trace the attacker's actions to help them resolve the incident. What does this scenario describe?

1 / 1 point

- ☒ Reviewing a history file in a CLI
- ☐ Repeating a process using icons
- ☐ Reviewing a history file in a GUI
- ☐ Examining the usage of files and applications from a start menu

Correct

9. Fill in the blank: On a computer, the ____ handles resource and memory management.

1 / 1 point

- ☐ hardware
- ☐ browser
- ☐ task manager
- ☒ operating system

Correct
