1. As a security analyst, you might use Linux to review logs when investigating an issue.

1 / 1 point

- ☒ True
- ☐ False

Correct

As a security analyst, you might use Linux to review logs when investigating an issue. Another reason you might use Linux is to verify access and authorization.

2. Which of the following are components of the Linux architecture? Select all that apply.

1 / 1 point

☒ The shell**Correct**

Components of the Linux architecture include applications, the shell, and the kernel. The user, the Filesystem Hierarchy Standard (FHS), and hardware are also components of the Linux architecture.

☒ The kernel**Correct**

Components of the Linux architecture include applications, the shell, and the kernel. The user, the Filesystem Hierarchy Standard (FHS), and hardware are also components of the Linux architecture.

☐ The operating system☒ Applications**Correct**

Components of the Linux architecture include applications, the shell, and the kernel. The user, the Filesystem Hierarchy Standard (FHS), and hardware are also components of the Linux architecture.

3. Fill in the blank: The Filesystem Hierarchy Standard (FHS) is the component of Linux architecture that ____.

1 / 1 point

- ☐ consists of the physical components of a computer
- ☒ organizes data
- ☐ manages processes and memory
- ☐ enables people to communicate with the system

Correct

The Filesystem Hierarchy Standard (FHS) is the component of the Linux OS that organizes data.

4. Which of the following hardware components are peripheral devices? Select all that apply.

1 / 1 point

☒ a printer**Correct**

Monitors and printers are peripheral devices. Peripheral devices are hardware components that are attached and controlled by the computer system. The CPU and RAM are internal hardware. Internal hardware are the components required to run the computer.

☒ a monitor**Correct**

Monitors and printers are peripheral devices. Peripheral devices are hardware components that are attached and controlled by the computer system. The CPU and RAM are internal hardware. Internal hardware are the components required to run the computer.

☐ a CPU☐ RAM
