

Your grade: 80%

You scored 80% - You're right! 80% - To pass you need at least 70%. Retake your highest score.

Total items: 8

1. What is a command?
- 1 point
- ☐ A component of the Linux architecture
 - ☐ A common shell in many Linux distributions
 - ☐ An instruction that tells a computer to do something
 - ☐ The highest-level directory in Linux
 - ☒ Incorrect
- A command is an instruction that tells a computer to do something. Bash is a common shell used in many Linux distributions.
2. Which of the following commands prints the working directory to the screen?
- 1 point
- ☐ ls
 - ☐ head
 - ☐ pwd
 - ☐ cat
 - ☒ Correct
- The `pwd` command prints the working directory to the screen.
3. What does the `cd` command do?
- 1 point
- ☐ Displays the current file in the current directory
 - ☐ Outputs a specified string of text
 - ☐ Navigates between directories
 - ☐ Prints the working directory to the screen
 - ☒ Correct
- The `cd` command navigates between directories.
4. A security professional enters `head -n 500 /etc/passwd` into a shell. What are they telling the operating system to do?
- 1 point
- ☐ Return the content of `/etc/passwd`, back one page at a time
 - ☐ Display the first 500 lines of `/etc/passwd`
 - ☐ Add a header to the file named `/etc/passwd`
 - ☐ Remove the first 5 lines of `/etc/passwd`
 - ☒ Correct
- They are telling the operating system to display the first 500 lines of `/etc/passwd`. The `head` command displays just the beginning of a file by default 10 lines.
5. What is the difference between an absolute file path and a relative file path?
- 1 point
- ☐ An absolute file path starts from the root, and a relative file path starts from the current directory.
 - ☐ An absolute file path starts from the current directory, and a relative file path starts from the root.
 - ☐ An absolute file path ends with a backslash (\), and a relative file path ends with a forward slash (/).
 - ☐ An absolute file path ends with a forward slash (/), and a relative file path ends with a backslash (\).
 - ☒ Correct
- An absolute file path is the full file path that starts from the root, and a relative file path is a shorter file path that starts from the current directory.
