

HA VPN as an Alternative Cloud VPN Gateway

In addition to Classic VPN, Google Cloud also offers a second type of Cloud VPN gateway, HA VPN. HA VPN is a high availability Cloud VPN solution that lets you securely connect your on-premises network to your Virtual Private Cloud (VPC) network through an IPsec VPN connection in a single region. HA VPN provides an SLA of 99.99% service availability.

For more information on HA VPN, refer to the documentation [Cloud VPN topologies](#).

For information on moving to HA VPN, see [Moving to HA VPN](#).
