

Next Steps: [View More](#)

22. Which of the following is not a function of a data warehouse?

(3.13) $\text{get}(\text{get}(x)) = x$

- Key words**
 Glut is a collection of applications, tools, and workflows that can automatically respond to security events.

- Next work**
During the normalisation step in the GEM process, the data is normalised to a more consistent log scale. The normalisation process involves: [Scoring the data](#) and [weighting the normalised data](#).

- Aggregation** is the process of gathering data from different sources and putting it in one central and unified place.
