Total items: 18

1. What is the correct use case for Cloud Storage?

1 / 1 point

- ☐ Cloud Storage is well suited to providing SaaS services.
- ☐ Cloud Storage is well suited to providing durable and highly available object storage.
- ☐ Cloud Storage is well suited to providing data warehousing services.
- ☐ Cloud Storage is well suited to providing the root file system of a cloud virtual machine.
- ☒ Correct
That's correct! Cloud Storage is object storage rather than file storage.

2. Which relational database service can scale to higher database sizes?

1 / 1 point

- ☐ Cloud SQL
- ☐ Spanner
- ☐ Firestore
- ☒ Correct
Correct! Spanner can scale to petabyte database sizes, while Cloud SQL is limited by the size of the database instance you choose. At the time this quiz was created, the maximum was 4TB.

3. Why would a customer consider the Coldline storage class?

1 / 1 point

- ☐ To save money on storing frequently accessed data.
- ☐ To improve security.
- ☐ To save money on storing infrequently accessed data.
- ☐ To save the Coldline Storage API.
- ☒ Correct
That's correct! Data stored in Coldline is billed at a low monthly storage rate, although a fee is assessed on retrievals.
