Back

Activity: Increase productivity with the help of Gemini for Google Workspace

Practice Assignment • 15 min

Due Jul 24, 11:59 PM IST

Activity details

This activity is optional, but highly recommended to help you practice using AI tools. At the end, you'll answer self-assessment questions to reflect on your learning. If you're unable to complete this activity, you'll still be able to progress through the course and earn a certificate from Google.

As a quick reminder, here's how generative AI tools work:

1. You provide input (i.e., a prompt) to the AI tool.
2. The AI tool processes the input.
3. The AI tool produces output.

Remember that providing human oversight is crucial when using an AI tool, so always be sure to review AI-generated output and give additional instructions to the tool as needed.

AI tool access

To access Gemini in Workspace sign up for Workspace Labs with a Google Account. **Gemini in Workspace apps is not available in certain countries and languages.** For more details, refer to Where you can use Google Workspace Labs.

To access Gemini in Workspace apps:

- Sign in to your Google Account.
- Sign up for Workspace Labs.
- After user sign-up, Workspace Labs is turned on. An in-product welcome screen will appear the next time you open a Workspace app, such as Google Docs and Sheets.

Refer to the resource about how to Create a Google Account, if you don't already have one. For more information on Workspace Labs, you can also review the documentation on how to Get started with Google Workspace Labs.

Note: Before you use Gemini in Workspace apps, review the following information:

- Workspace Labs is a program for testing Google Workspace features before they become broadly available.
- For more details on using Gemini, such as who can use Gemini, Gemini's Privacy Notice, and where Gemini is currently available, refer to the Gemini Apps FAQ.
- Review the Google Workspace Labs Privacy Notice and Terms for Personal Accounts.
- Please don't enter private or confidential information in your Gemini in Workspace apps conversations or any data you wouldn't want Google to use to improve its products, services, and machine learning technologies. Google uses Workspace Labs Data and metrics to provide, improve, and develop products, services, and machine learning technologies across Google, including Google's enterprise products.
- While Gemini in Workspace apps is improving every day, users may see slightly different experiences in their Workspace instance as feedback and new features are incorporated into the product.
- Feedback from a wide range of experts and users helps Gemini in Workspace apps improve every day. You can provide feedback using the thumbs up or thumbs down button—with the option to further explain in a comment.

Read through the following options. Then complete the activity using the option that best suits you.

Option 1: Explore Gemini in Workspace apps in your daily life

Choose a task or project in your professional or personal life that involves any of the activities listed below. For example, you might need to plan an event and communicate details to attendees, or you might need to create a budget and share it with someone. Just make sure the task involves at least one of these activities:

- Drafting a **document**
- Developing a **presentation**
- Working in a **spreadsheet**
- Sending an **email**
- Taking notes during a **virtual meeting**

Option 2: Manage a bookstore with help from Gemini in Workspace apps

You're the manager of an independent bookstore, and you want to understand the profits from your fiction book sales. You decide to use Gemini in Google Workspace apps to help you with this task by creating:

- A **document** reporting information about sales
- A **presentation** to summarize the information about sales to your staff
- A **spreadsheet** to track sales
- An **email** to invite suppliers to a presentation you'll give about book sales
- Taking notes during a **virtual meeting**

Let's get started.

Gemini in Docs

To speed up the drafting, editing, and proofreading process with Gemini in Docs, follow these steps:

1. Open Google Docs. You may need to sign in.
2. Select **Blank document** to open a blank document in Docs.
3. Select **Help me write** to launch Gemini in Docs. For more details, refer to the Write with Gemini in Google Docs documentation.
4. Enter a prompt into Gemini.
5. Select **Create**.
6. Select **Insert**.

Option 1:

If your task involves drafting a document, enter a prompt into Gemini in Docs. You might ask it to write a first draft, create a template for the document, or proofread something you've already written.

Evaluate Gemini's output and revise it so that you're satisfied.

Option 2:

Enter this prompt into Gemini in Docs: *I'm a bookstore manager and need to write a report analyzing fiction book sales by genre. Create a template for the report. It should include sections for each of these genres: literature, historical fiction, romance, science fiction, fantasy, mystery, and horror.*

Once Gemini adds the template to your document, evaluate the template and then revise it so that you're satisfied.

Gemini in Slides

To design, organize, and outline slides for a presentation using Gemini in Slides, follow these steps:

1. Go to Gemini in Google Slides. You may need to sign in.
2. Click **Blank presentation** to open a blank presentation in Google Slides.
3. Select **Slide** > **Help me create a slide** to launch Gemini in Google Slides. For more details, refer to documentation about how to Create images with Gemini in Google Slides.
4. Enter a prompt into Gemini.
5. Use the **Enter** keyboard command.
6. Select **Insert**.

Option 1:

If your task involves developing a presentation, enter a prompt into Gemini in Slides. You might ask it to draft notes for a presentation, come up with titles for a slide, or add an image.

Evaluate Gemini's output and revise it so that you're satisfied.

Option 2:

Enter this prompt into Gemini in Slides: *I'm a bookstore manager and need to develop a presentation to share information about fiction book sales with staff. Create a template for a slide with information about fiction book sales by genre. It should include bullet points for each of these genres: literature, historical fiction, romance, science fiction, fantasy, mystery, and horror.*

Once Gemini adds the template to your presentation, evaluate the template and then revise it so that you're satisfied.

Gemini in Sheets

To get help with data entry and analysis using Gemini in Sheets, follow these steps:

1. Go to Gemini in Google Sheets. You may need to sign in.
2. Click **Blank spreadsheet** to open a blank spreadsheet in Google Sheets.
3. Select **Insert** > **Help me organize** to launch Gemini in Google Slides. For more details, refer to documentation about how to Organize with Gemini in Google Sheets.
4. Enter a prompt into Gemini.
5. Select **Create**.

Option 1:

If your task involves working in a spreadsheet, like tracking people's contact information or keeping account of sales, enter a prompt into Gemini in sheets. You might ask it to populate the spreadsheet with data, perform a calculation, or create a table for your monthly expenses.

Evaluate Gemini's output and revise it so that you're satisfied.

Option 2:

Enter this prompt into Gemini in Sheets: *Create a table to track book sales by genre. It should include a row for each of these genres: literature, historical fiction, romance, science fiction, fantasy, mystery, and horror.*

Once Gemini adds the table to your spreadsheet, evaluate the spreadsheet and then revise it so that you're satisfied.

Gemini in Gmail

To make reading, drafting, and responding to emails more efficient using Gemini in Gmail, follow these steps:

1. Open Gmail and start a new email by clicking **Compose**.
2. Launch Gemini by clicking the **Help me write** icon. For more details, refer to the Draft emails with Gemini documentation.
3. Enter a prompt into Gemini.
4. Select **Create**.
5. Select **Insert** to add the generated text to your email.

Option 1:

If your task involves sending an email, enter a prompt into Gemini in Gmail. You might ask it to draft a message, summarize a long passage, or search for a particular email in your inbox.

Evaluate Gemini's output and revise it so that you're satisfied.

Option 2:

Enter this prompt into Gemini in Gmail: *I'm a bookstore manager, and I want to invite my book suppliers to attend a virtual presentation about book sales from my store. My goal is to help them understand what my customers want. Write a friendly and professional email, and explain why the presentation is important for them to attend.*

Once Gemini drafts the email, evaluate it and then revise it so that you're satisfied.

Gemini in Meet

To take notes during a meeting using Gemini in Meet, follow these steps:

1. Open Google Meet.
2. Select **New meeting** > **Start an instant meeting**.
3. Select **Take notes with Gemini** > **Start taking notes**
4. End the meeting. The meeting notes document is generated shortly after the meeting and saved in your Drive folder.

Review the notes, and edit them to make sure they include all the information from the meeting. You can share the notes with attendees or anyone who might not have been able to attend.

1. **Self assessment: Reflect on your experience using Gemini in Google Workspace. In which apps did you find Gemini most helpful?** ***Select all that apply.*** 1 point

   ☐ Docs
   ☐ Slides
   ☐ Sheets
   ☐ Gmail
   ☐ Meet

2. **Self assessment: Consider how generative AI can be used in different kinds of apps, like Docs, Sheets, or Meet. How might you use generative AI in different Workspace apps in your daily life?** ***Write 1–3 sentences.*** 1 point

   What do you think?
