AI for App Building ✕

Module 1
Discover vibe coding

Module 2
Learn how to vibe code

- ✓ Learn how to build a custom AI tool
  Video • 4 min
- ✓ Develop functional apps to handle manual tasks
  Reading • 2 min
- ✓ Build with AI: Tie breaker app for better decision making
  Lab • 12 min
- ✓ Build with AI: Brand builder app to visualize any product
  Lab • 12 min
- ✓ Build with AI: Interactive dashboard to uncover data insights
  Lab • 12 min

Module 3
Create your app using AI Studio

- ○ **Identify tasks for your app**
  Reading • 2 min
- ○ Evaluate your workflow to build an app
  Reading • 8 min
- ○ Ammaar, what's your pro tip for building apps?
  Video • 1 min
- ○ Build with AI: A custom app to help you at work
  Lab • 12 min
- ○ Ammaar, can AI models be combined?
  Video • 38 sec
- ○ Measure the impact of your app
  Reading • 2 min
- ○ Course challenge
  Graded Assignment • 10 min
- ○ Claim your course completion badge
  Reading • 2 min
- ○ Get started on the next course
  Reading • 10 min
- ○ Resources for Google AI Professional Certificate graduates
  Reading • 2 min
- ○ End-of-course survey
  Ungraded Plugin • 15 min

Identify tasks for your app

0:03 / 1:16 1x

The first step to building your app is to write down your work goals and all the tasks required to accomplish them. These goals and tasks make up your workflow. Mapping out your workflow will help you identify opportunities to use AI and the type of app that will have the biggest impact on you and your work.

To begin, you'll need to fill out the worksheet:

Click here to access the worksheet and create a copy by clicking the "USE TEMPLATE" button. You'll fill out your copy of the worksheet with your unique goals, tasks, and workflows. Then you'll rate these tasks to identify where an app can provide the most value.

What you'll gain from completing this worksheet:

- **Clear direction and immediate action:** Map your workflow to identify opportunities to use AI, as well as specific tasks where an app can provide the most value.
- **Repeatable problem solving:** Evaluate pain points in your workflow and identify opportunities to create an app that can help solve them.
- **Strategic clarity:** Discover where AI can help you do higher quality work faster.

As you fill out the worksheet, be specific. The more accurately you map your tasks, the more clarity you'll have on what app to build.

Let's find out where an app can help you the most!
