Module 1
Discover vibe coding

Module 2
Learn how to vibe code

Module 3
Create your app using AI Studio

- Identify tasks for your app
  Reading • 2 min
- Evaluate your workflow to build an app
  Reading • 8 min
- Ammaar, what's your pro tip for building apps?
  Video • 1 min
- Build with AI: A custom app to help you at work
  Lab • 12 min
- Ammaar, can AI models be combined?
  Video • 38 sec
- **Measure the impact of your app**
  Reading • 2 min
- Course challenge
  Graded Assignment • 10 min
- Claim your course completion badge
  Reading • 2 min
- Get started on the next course
  Reading • 10 min
- Resources for Google AI Professional Certificate graduates
  Reading • 2 min
- End-of-course survey
  Ungraded Plugin • 15 min

Measure the impact of your app

0:04 / 1:12 1x

Congratulations, you successfully completed the capstone project by creating an app! You didn't just map out a workflow. You built a real solution for yourself. You now have the skills and experience to spot opportunities to use AI across all your work.

What's next? Take your app for a test run and see how it works.

After you've spent time using your new app, ask yourself the following questions:

- **What did I just achieve?** How do you feel knowing you just developed a working app without ever writing a line of code?
- **How much time have I saved?** How many hours per week or month did you gain back?
- **Have I reduced costs?** Did this reduce any expenses, like saving money on tools you no longer need or subscription services you replaced?
- **Has the quality of my work improved?** Are you experiencing fewer errors, better outputs, or higher satisfaction with your work?
- **Am I more productive?** Are you able to complete more tasks or projects?
- **Did I discover something new?** What unexpected benefits did you discover when you used your app?

You've gained the ability to turn an idea into an app with AI. Take a moment to celebrate and think of ways you can build other solutions.
