

Empowering Data Science

At H2O, we believe data science should be accessible to everyone. Our open-source machine learning platform, H2O, is designed to be easy to use, scalable, and secure. We provide a comprehensive suite of tools and services to help you unlock the power of your data. Visit h2o.ai to learn more.

A Very Brief Review of RAG

Retrieval-Augmented Generation (RAG) is a technique for generating text by retrieving relevant information from a large corpus of data. It combines the strengths of Retrieval and Generation.
