Module 1
Introduction to RAG

Module 2
Build Apps with RAG

Create an Interactive RAG Application with a User-Friendly Gradio Interface

- ✓ Getting Started with Gradio
  Video • 3 min
- ✓ Reading: Introduction to Gradio
  Ungraded Plugin • 15 min
- ✓ Lab: Set Up a Simple Gradio Interface to Interact with Your Models
  Ungraded App Item • 30 min
- ✓ Lab: Construct a QA Bot that Leverages the LangChain and LLM to Answer Questions from Loaded Document
  Ungraded App Item • 30 min
- ✓ Practice Quiz: Building Apps with RAG
  Practice Assignment • Grade: 100%

Summary and Evaluation

- ✓ Summary and Highlights: Building Apps with RAG
  Reading • 2 min
- ✓ Cheat Sheet: Building Apps with RAG
  Ungraded Plugin • 5 min
- ✓ Graded Quiz: Building Apps with RAG
  Graded Assignment • Grade: 100%

Module 3
Build RAG Apps with LlamaIndex

Application Development with LlamaIndex

- ✓ Intro to LlamaIndex: Document Ingestion and Chunking
  Video • 7 min
- ✓ Intro to LlamaIndex: From Vector Stores to Query Engines
  Video • 5 min
- ✓ Reading: LangChain and LlamaIndex Compared
  Ungraded Plugin • 15 min
- ✓ Lab: Build an AI Icebreaker Bot with IBM Granite 3.0 & LlamaIndex
  Ungraded App Item • 45 min
- ✓ Practice Quiz: Application Development with LlamaIndex
  Practice Assignment • Grade: 80%

Summary and Evaluation

- ○ **Summary and Highlights: Build RAG Apps with LlamaIndex**
  Reading • 5 min
- ○ Cheat Sheet: Build RAG Apps with LlamaIndex
  Ungraded Plugin • 5 min
- ○ Graded Quiz: Build RAG Apps with LlamaIndex
  Graded Assignment • 21 min

Course Wrap Up

- ○ Course Wrap-Up
  Video • 6 min
- ○ Congratulations and Next Steps
  Reading • 2 min
- ○ Team and Acknowledgments
  Reading • 5 min

Summary and Highlights: Build RAG Apps with LlamaIndex

6 XP • Advanced RAG System Implementation   3 XP • Applied Generative AI Development and Strategy

Congratulations! You have completed this lesson. At this point in the course, you know:

- LlamaIndex is a flexible framework for building LLM-powered applications that focuses on context augmentation through structured document ingestion, chunking, indexing, and retrieval.
- LlamaIndex offers built-in document loaders and customizable query engines, unlike LangChain, which emphasizes chaining steps in workflows.
- To design a conversational RAG app with LlamaIndex, ingest LinkedIn profile data, chunk it into nodes, embed and store vectors, and use a response synthesizer or query engine to generate personalized responses from user prompts.
- You can apply the RAG pipeline—loading, chunking, indexing, and querying—using LlamaIndex's document, node, index, and query engine classes.
