

# Architecting with Google Kubernetes Engine: Production

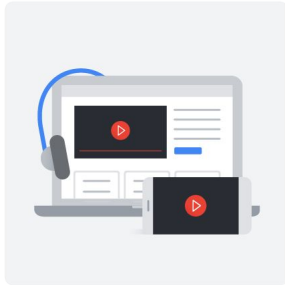

Welcome to the “Architecting with Google Kubernetes Engine: Production” course.  
This is the second course in the Architecting with Google Kubernetes Engine series.

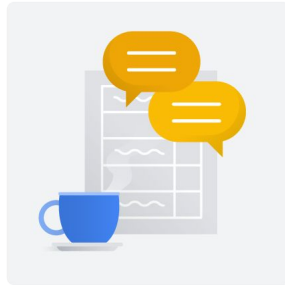

Getting the most out of Kubernetes means understanding its architecture and best practices.

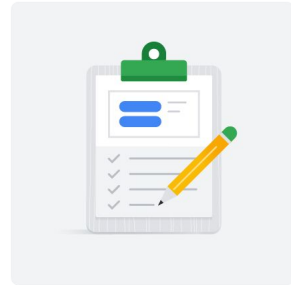

We're here to introduce you to the tools to design robust, scalable, and secure applications using GKE.

Videos

Quizzes

Hands-on labs

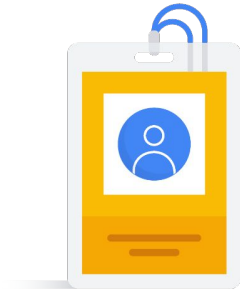

Through a combination of videos, quizzes, and hands-on labs, you'll get comfortable with GKE architecture and practice building your own containerized applications.

## Architecting with Google Kubernetes Engine: Production

- 01 Access control and security
- 02 Logging and monitoring
- 03 Google Cloud managed storage services
- 04 CI/CD with GKE

You'll begin with an introduction to access control and security. You'll then explore logging and monitoring, and Google Cloud managed storage services. Finally, before wrapping up, you'll learn how to use CI/CD with GKE.

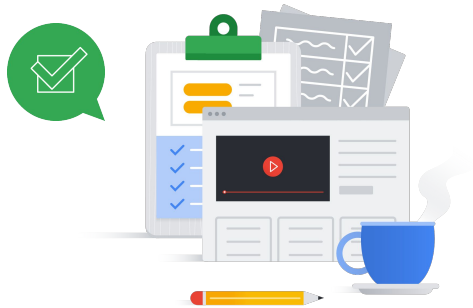

- ✓ Developers
- ✓ DevOps Engineers
- ✓ Cloud Architects

With basic to  
intermediate  
knowledge of  
GKE.

This course was designed for developers, DevOps engineers, and cloud architects with basic to intermediate knowledge of GKE.

## Getting Started with Google Kubernetes Engine

Oh, and if you haven't already done so, you'll need to complete the *Getting Started with GKE* course and the *Architecting with Google Kubernetes Engine: Workloads* course before starting this one.

Google Cloud

Okay, let's begin.
