You're getting there! Review your feedback before trying again.
Fantastic work—you're showing strong mastery of security controls, encryption, authentication factors, access logging, and separation of duties, which builds a powerful foundation in assets, threats, and vulnerabilities! Keep this momentum going as you explore your personalized feedback and next challenges.
1. What is the purpose of security controls? 1 / 1 point
Reduce specific security risks
Nice work
2. An employee reports that they cannot log into the payroll system with their access credentials. The employee does not recall changing their username or password. As a security analyst, you are asked to review access logs to investigate whether a breach occurred. What information are you able to review as a data controller in this situation? Select two answers. 1 / 1 point
The time the user signed in and out
Nice work
The IP address of the computer used to log in
Nice work
3. Which type of encryption is generally slower because the algorithms generate a pair of encryption keys? 1 / 1 point
Asymmetric
Nice work
4. A security analyst is investigating a critical system file that may have been tampered with. How might the analyst verify the integrity of the system file? 1 / 1 point
By comparing the system files hash value to a known, trusted hash value.
Nice work
5. Which security controls are used in public key infrastructure (PKI)? Select three answers. 1 / 1 point
Digital certificates
Nice work
Asymmetric encryption
Nice work
Symmetric encryption
Nice work
6. What factors do authentication systems use to verify a user's identity? Select three answers. 1 / 1 point
Knowledge
Nice work
Ownership
Nice work
Characteristic
Nice work
7. What is a key advantage of multi-factor authentication compared to single sign-on? 1 / 1 point
It requires more than one form of identification before granting access to a system.
Nice work
8. A shipping company imports and exports materials around the world. Their business operations include purchasing goods from suppliers, receiving shipments, and distributing goods to retailers. How should the shipping company protect their assets under the principle of separation of duties? Select two answers. 1 / 1 point
Have one employee file purchase orders.
Nice work
Have one employee approve purchase orders
Nice work
9. What types of user information does an API token contain? Select two answers. 1 / 1 point
A user's site permissions
Nice work
A user's identity
Nice work
10. What is the practice of monitoring the access logs of a system? 1 / 1 point
Accounting
Nice work
