Correct

You're getting there! Review your feedback before trying again.

Feedback: Great! Keeping track of vulnerability management and the lifecycle, and defining the steps authentication takes. There are some security foundations you're doing in managing things like network or going to you explore your personal feedback for more expert insight.

1. Which of the following are steps in the vulnerability management process. Select two answers.

1/1 point

☒ Proactively identify threats

☒ Identify vulnerabilities

☒ Identify vulnerabilities

☒ Identify vulnerabilities

2. An organization is affected by a vulnerability that was previously unknown. What is this exploit an example of?

1/1 point

☒ Zero-day

☒ Zero-day

☒ Zero-day

☒ Zero-day

3. Which type of the defense in depth strategy is a user authentication layer that mainly filters external access?

1/1 point

☒ Firewall

☒ Firewall

☒ Firewall

☒ Firewall

4. A security researcher reports a new vulnerability to the CISO. What of the following criteria would be vulnerability most useful to include in CVSS? Select two answers.

1/1 point

☒ It must be independently Public

☒ It must be independently Public

☒ It must be independently Public

☒ It must be independently Public
