Reveal Answer

1. What is the best output format to choose when exporting your video from CapCut for desktop to ensure compatibility with most social media platforms?

1 / 1 point

- ☐ H264 format
- ☐ H265 format
- ☒ H264 format
- ☐ AV1 format

Nice work

Great job! H264 is widely used and supported across various social media platforms, making it the ideal choice for video exports.

2. In the lesson titled "Full Edit Workflow From Scratch," which of the following steps is essential in organizing media files before starting a project in CapCut?

1 / 1 point

- ☐ Name files sequentially by date
- ☐ Use default folder settings
- ☐ Import all media files directly into the timeline
- ☒ Create a separate folder for each type of media

Nice work

Well done! Organizing media in separate folders helps streamline the editing process and increases efficiency.

3. What is one crucial step emphasized in the conclusion for perfecting TikTok videos using CapCut?

1 / 1 point

- ☐ Limit video duration to 15 seconds for higher engagement.
- ☐ Add as many effects as possible to make the video stand out.
- ☐ Always use the default settings for exporting videos.
- ☒ Ensure all transitions align with the beats of the music.

Nice work

Great job! Aligning transitions with music beats enhances the flow and professionalism of the video.

4. Which techniques can be used to achieve perfect colors in video editing? Select all that apply.

1 / 1 point

- ☒ Using LUTs (Look-Up Tables) to standardize colors
- ☐ Nice work
- Correct! LUTs can be applied to standardize and enhance color grading.
- ☒ Calibrating your monitor for accurate color display
- ☐ Nice work
- Correct! Monitor calibration is essential to ensure the colors you see are accurate.
- ☐ Applying color saturation uniformly across clips
- ☐ Increasing audio gain for better sound clarity
- ☒ Adjusting the white balance settings
- ☐ Nice work
- Correct! White balance adjustments are crucial for achieving accurate colors.

5. What is the primary purpose of color grading in video editing?

1 / 1 point

- ☒ To enhance mood and narrative through color adjustments
- ☐ To increase video resolution and sharpness
- ☐ To match the colors of different clips for visual consistency
- ☐ To fix lighting issues and improve exposure

Nice work

Correct! Enhancing mood and narrative is a core purpose of color grading in video editing.

6. Which of the following features should be utilized in CapCut for ensuring a professional edit workflow when creating a video from scratch?

0.6 / 1 point

- ☒ Using random transitions for variety
- ☒ This should not be selected
- Using random transitions can disrupt the flow and coherence of the video, detracting from a professional finish.
- ☐ Exporting video in low resolution
- ☒ Using keyframe animations
- ☐ Nice work
- Correct! Keyframe animations add dynamic movement and transitions to your video, enhancing its professional quality.
- ☒ Applying color correction
- ☐ Nice work
- Correct! Color correction ensures your video's visual consistency and can greatly improve its aesthetic appeal.
- ☐ Renaming clips to match project theme
