Automate notetaking to enhance teamwork

0:00 / 0:31

In the upcoming lab, Clara from Gemini Marketing will show you how to use Gemini in Google Meet to capture meeting notes and transform them into a structured action plan that clarifies decisions, assigns owners, and sets deadlines.

What you'll gain:

- Focused meetings:** Stay engaged in discussions without having to take detailed notes at the same time
- Actionable next steps:** Transform conversations into clear action plans with assigned owners and deadlines
- Better team alignment:** Give everyone a shared source of truth about what was decided and what happens next

Apply what you learn:

In the lab, we'll demonstrate how to transform meeting notes into an action plan using a transcript from a vendor management meeting. However, to really get the most out of the lab, take a meeting transcript of your own and ask Gemini to help you create something new. The goal isn't to copy our exact process, but to build a system that enables better communication and collaboration for you and your team.

Ready to turn meeting chaos into clarity? Let's dive in.

Google AI Pro recommended: This lab is optimized for Google's most capable models. While you can use the no-cost version of Gemini, we recommend Google AI Pro for higher access to Google's advanced AI models and features. As a learner enrolled in this certificate, you are eligible for a complimentary 3-month trial subscription to help you build your portfolio. We encourage you to [activate your trial](#) before beginning this lab.
