Instructions

Gemini

Hi Clara

Where should we start?

Get help... One step...

Google Docs

I'm working on a proposal for a new GPS system for our logistics company. Act as the approval, our Head of Operations, and review the one-page attached.

If the Gemini app fails to load, navigate to the URL, log in your browser and manually enter [access_token](#).

Build with AI: Feedback report

To use the features covered in this lab, sign into Gemini using your Google Account.

As you follow the video instructions in this lab, customize the prompts below to fit your own work.

Feel free to pause the video as needed.

Lab tasks:

Step 1: Give Gemini a persona to get feedback

Click the "New chat" button to start a new chat with Gemini. Then, attach a document you'll want feedback on. If you don't have your own, you can use this [sample document](#). Then, paste the prompt below and replace the text in [brackets] with your own details.

I'm working on a [type of document, e.g. proposal or report] for [brief description of your project]. Act as the [stakeholder you want feedback from and list their priorities], and review the document attached. From your perspective, is there any information missing?

Review Gemini's response. You will use these details in the next step.

Step 2: Work through potential edits

In the same chat with Gemini, work through a potential edit to address the feedback from the previous step. For example:

You provided the following feedback about [feedback topic, e.g. the proposal is not detailed enough]. I plan to resolve your feedback by [proposed resolution, e.g. including a timeline, budget, and resourcing]. Does that resolve the concerns, or are you looking for more?

Step 3: Draft a summary based on your new details

In the same chat with Gemini, paste the prompt below and replace the text in [brackets] with your new details.

How would you write a [desired length, e.g. 2-sentence] summary of this plan for the [document, e.g. one-page]?

You can now edit your document using Gemini's output as a starting point.

Next steps:

Continue working on your document to write an email for work. When you follow these steps for future communications, adjust the prompts and steps to anticipate what feedback you might receive from your stakeholders, and be proactive in making updates.

When you are satisfied with your outputs from this lab, you can close this page and return to the main screen of this cert.

Mark as completed
