Instructions

Gemini

Hi Owen
Where should we start?
You are a marketing expert in the audio industry.
+ Tools

0:45 / 3:56

If the Gemini app fails to load, navigate to the URL, log in your browser and manually enter [access token](#).

Build with AI: Strategic plan

To use the features covered in this lab, sign into Gemini using your Google Account.

As you follow the video instructions in this lab, customize the prompts below to fit your own work.

Feel free to pause the video as needed.

Lab tasks:

Step 1: Brainstorm new product ideas

Click the "New chat" button on the left side menu to start a new chat with Gemini. Then, paste the prompt below and replace the text in [brackets] with your own details.

You are a [persona, e.g. marketing expert] in the [industry, e.g. audio industry]. My company is developing a [new product, e.g. new line of premium headphones]. Help me brainstorm [ideas to brainstorm, e.g. new feature or add-on] that I could [generate, e.g. bundle with this product].

Review the ideas from Gemini. You will analyze them in the next step.

Step 2: Create a cost-benefit analysis table

In the same chat with Gemini, paste the prompt below to compare the options generated in the previous step. You can customize the columns of your table for your analysis.

Perform a [type of analysis, e.g. cost-benefit analysis] for each of these ideas. Format your response as a table with the following columns:

- [Column 1 name, e.g. Idea]
- [Column 2 name, e.g. Cost (low/medium/high)]
- [Column 3 name, e.g. Benefit (low/medium/high)]

Use the table created by Gemini to identify the options that provide high benefits at a low cost.

Step 3: Research industry trends

In the same chat with Gemini, paste the prompt below to get more context for your decision.

What are some current industry trends around [your product or industry]? I'd like to factor those insights into my decision.

Review the trends from Gemini. You will automate this research in the next step.

Step 4: Schedule a recurring analysis

In the same chat with Gemini, paste the prompt below to schedule the previous query to run automatically.

Run this analysis [desired frequency, e.g. once a week] so I can stay up to date on these trends.

After Gemini confirms the action, you can select "Edit" to change the name or adjust the schedule. When ready, outputs from your scheduled action will appear in your conversation list on the left-hand panel. To edit your scheduled action at a later time, select "Settings & help", then select "Scheduled actions" on the menu to open your list of scheduled actions.

Next steps:

Consider how you can use Gemini to help you evaluate ideas. Remember that Gemini can guide your assessment with any type of analysis, including ways that you frequently use when comparing different options in your own work.

When you are satisfied with your outputs from this lab, you can close this page and return to the main screen of this course.
