1. You are embarking on a new design. You provide a project brief doc, a design principles PDF, and a video walkthrough of the brand's style to the designer. You want to help them quickly understand the key points from all sources.

1 / 1 point
- From the options below, what is the most effective way to use NotebookLM to help the designer synthesize this information?
- Ⓐ Upload a PDF of applications from the previous year to Gemini Notebook to predict the dates for this summer. Then ask it to generate a schedule.

Ⓑ Create a custom AI expert to give advice on scheduling best practices, then search for specific event dates to build a schedule.

Ⓒ Prompt Gemini Deep Research to create a comprehensive list of summer music festivals and outdoor markets in your state, including vendor deadlines.

Ⓓ Prompt Gemini Deep Research to search for summer music festivals and outdoor markets in your state, then prompt Gemini to organize the final report into a schedule including vendor deadlines.

Ⓜ Try again

Review the lab about [Links of a research output](#).
2. You are a marketer. You're creating a custom AI expert persona to act as a copywriter that can provide feedback on an ad campaign. To do this, you used meta-prompting with Gemini to create a list of an expert copywriter's key characteristics. Then you pasted the list into a note that, instructing Gemini to act as the expert persona. However, when you review your campaign you notice that the feedback is too generic and does not align with your specific campaign goals.

1 / 1 point
- Based on the prompts for designing a custom AI expert, what is the most effective next step to improve your outputs?
- Ⓐ Add content about your specific role and the goals you are trying to achieve.

Ⓑ Use prompt chaining to create a new persona, then ask Gemini to write the copy within the same chat.

Ⓒ Ask Gemini to generate a revised list of copywriter characteristics.

Ⓓ Upload the list of characteristics to Gemini Notebook to generate a summary of the persona, and then use that summary in your prompt for Gemini.

Ⓜ Nice work
4. You are an event planner organizing a company-wide hybrid training session. You have a strict constraint: you must keep both the in-person and remote attendees fully engaged for four straight hours without the ability to use virtual breakout rooms. You want to use a custom AI expert to pressure-test your agenda.

1 / 1 point
- What is the most effective prompt to evaluate your agenda against this constraint?
- Ⓐ "Create a four-hour training schedule with 15-minute breaks built in for both in-person and remote attendees, considering the constraint that this is a hybrid event with no virtual breakout rooms."

Ⓑ "Provide a list of expert tips on how to maintain engagement during a four-hour hybrid meeting."

Ⓒ "Review my proposed four-hour agenda and identify potential engagement drops from the perspective of an expert corporate trainer, considering the constraint that this is a hybrid event with no virtual breakout rooms."

Ⓓ "Evaluate my proposed four-hour agenda from an expert trainer's perspective and provide a general list of its overall strengths and weaknesses."

Ⓜ Nice work
5. You are a custom cabinet maker. You are using Gemini Notebook to summarize various supplier catalogs, pricing sheets, and client emails for an upcoming kitchen remodel. You notice that the generated summary claims a specific high-end wood stain is currently discounted by your main supplier, but you recall them discontinuing that product last year.

1 / 1 point
- Based on best practices for checking AI-generated output, what is the most efficient next step?
- Ⓐ Upload the catalog to Gemini Notebook then ask for a list of discontinued items to check if the wood stain is included.

Ⓑ Follow the citation link in the generated summary directly to the specific supplier catalog to verify the item's status.

Ⓒ Review your past notes to find the supplier's pricing sheets.

Ⓓ Prompt Gemini Notebook to generate a new summary to see if the model consistently mentions the discount on the wood stain.

Ⓜ Nice work
6. You are a social media manager for a local public library. You want to build a reusable expert persona to draft your weekly event announcements. Your current instructions are: "Write a social media post for our library event." You notice the AI outputs are frequently too long, use corporate jargon, and forget to include your required local tags.

1 / 1 point
- Based on best practices for designing custom AI experts, which revised instruction prompt will most effectively fix this issue for future use?
- Ⓐ "What makes a good library post? Write one based on your answer and apply it to this event."

Ⓑ "Draft event announcements. Limit posts to 280 characters, use a welcoming, community-focused tone, and always include our local hashtags."

Ⓒ "Write a detailed social media post for our library event so people know all about our weekly events and facts about our building."

Ⓓ "Search for the most popular library memes and copy their exact text for our event announcement."

Ⓜ Nice work
