

Module 1

Build a research report with Gemini Deep Research

AI for research and insights

Video • 2 min

Quiz, what's the most common way you use AI?

Video • 2 min

Generate research reports to gain insights

Reading • 2 min

Build with AI: Research report

Lab • 12 min

Tell what advice do you give your friends who want to use AI?

Video • 10 min

Module 2

Create and share research summaries in Gemini Notebook

Module 3

Build an expert advisor with Gemini

Generate research reports to gain insights

0:00 / 0:45

In this Lab, Multi from Google DeepMind will show you how Gemini Deep Research can help you gather and synthesize complex information from many sources and turn it into a digestible report. You'll practice strategic research planning, where you'll collaborate with AI to define the scope, sources, and focus of your research before it begins. You'll start by asking a broad research question. Then, you'll refine your research plan and generate a report that answers the question.

What you'll gain:

- Comprehensive answers:** Go from a complex question to a detailed report without spending hours browsing
- Targeted, relevant results:** Customize your research plan so it focuses on the exact information, timeframes, and sources you need
- Shareable insights:** Quickly turn dense research into an easy-to-understand infographic that you can share with others

Apply what you learn:

We'll demonstrate how to research market trends for a new paint line. However, you can apply this technique to any complex research task. Think about using it to create a competitive analysis, research potential new software to adopt, or learn about the potential impact of new industry regulations. Customize the research plan to fit your specific questions.

Let's get you the answers you need!

Google AI Pro recommended: This lab is optimized for Google's most capable models. While you can use the no-cost version of Gemini, we recommend Google AI Pro for higher access to Google's advanced AI models and features. As a learner enrolled in this certificate, you are eligible for a complimentary 3-month trial subscription to help you build your portfolio. We encourage you to [activate your trial](#) before beginning this lab.
