1. **What is filtering in SQL?** 1 / 1 point

- ○ Removing invalid records
- ◉ Selecting data that match a certain condition
- ○ Removing unnecessary data from the database
- ○ Changing a table to match a condition

Nice work

Filtering in SQL is selecting data that match a certain condition. Analysts use filters in SQL to return the data they need.

2. **You are working with the `Chinook` database and want to return the `firstname`, `lastname`, and `phone` of all employees. Replace `--???` with the missing information to complete the query. (If you want to undo your changes to the query, you can click the Reset button.)** 1 / 1 point

```
select firstname, lastname, phone
FROM employees;
```

Run
Reset

What is Andrew Adams' phone number?

- ○ +1 (403) 467-3351
- ○ +1 (780) 836-9987
- ◉ +1 (780) 428-9482
- ○ +1 (403) 262-3443

Nice work

Andrew Adams' phone number is +1 (780) 428-9482. By replacing `--???` with `SELECT firstname, lastname, phone`, you can complete the query and return this result.

3. **A security analyst wants to filter the `log_in_attempts` table for records where the value in the country column is `'Canada'`. What is a valid query for this?** 1 / 1 point

- ○ `SELECT WHERE country = 'Canada'`

  `FROM log_in_attempts;`
- ◉ `SELECT *`

  `FROM log_in_attempts`

  `WHERE country = 'Canada';`
- ○ `WHERE country = 'Canada'`

  `SELECT *`

  `FROM log_in_attempts;`
- ○ `SELECT *`

  `FROM log_in_attempts`

  `WHERE country = Canada;`

Nice work

The security analyst can use the following query to filter the `log_in_attempts` table for records where the value in the country column is `'Canada'`:

`SELECT *`

`FROM log_in_attempts`

`WHERE country = 'Canada';`

4. **Which pattern matches with any string that starts with the character `'A'`?** 1 / 1 point

- ○ `'%A'`
- ○ `'A'`
- ◉ `'A%'`
- ○ `'%A%'`

Nice work

The percentage sign (`%`) is a wildcard that substitutes for any number of other characters. The pattern `'A%'` matches with any string that starts with the character `'A'`.
