1. What internet communication protocol allows two devices to form a connection and stream data? 1 / 1 point
- ☐ Address Resolution Protocol (ARP)
- ☐ Hypertext Transfer Protocol Secure (HTTPS)
- ☐ Secure Sockets Layer/Transport Layer Security (SSL/TLS)
- ☒ Transmission Control Protocol (TCP)
- Correct
2. What set of standards is known as Wi-Fi? 1 / 1 point
- ☐ 802.11
- ☐ WPA
- ☒ IEEE 802.11
- ☐ WEP
- Correct
3. A firewall administrator installs a firewall function to either block or allow certain port numbers to limit unwanted communication. What function does this scenario describe? 1 / 1 point
- ☐ Using cloud-based firewalls
- ☐ Location masking
- ☒ Port filtering
- ☐ Organizing data packets
- Correct
4. Which firewall offers the most security features? 1 / 1 point
- ☐ Stateful firewall
- ☒ Next generation firewall (NGFW)
- ☐ Stateless firewall
- ☐ Documented firewall
- Correct
5. What network security service masks a device's virtual location to keep data private while using a public network? 1 / 1 point
- ☐ Domain name system (DNS)
- ☒ Virtual private network (VPN)
- ☐ Network segmenter
- ☐ Cloud service provider (CSP)
- Correct
6. Fill in the blank: VPN services perform _____ to protect sensitive data by wrapping it in other data packets. 1 / 1 point
- ☒ encapsulation
- ☐ network segmentation
- ☐ transmission control
- ☐ packet sniffing
- Correct
Please review [the video about virtual networks](#). Cf.
7. What network zone contains the internet and other services that are outside of an organization's control? 1 / 1 point
- ☐ Restricted
- ☐ Controlled
- ☐ Demilitarized
- ☒ Uncontrolled
- Correct
8. What is the function of the demilitarized zone (DMZ)? 1 point
- ☐ Organize data by forwarding it to other servers
- ☐ Isolate servers exposed to the internet from the rest of a network
- ☒ Encrypt data as it travels across the internet
- ☐ Protect highly confidential information accessible only to employees with certain privileges
- Incorrect
Please review [the video about security zones](#). Cf.
9. Fill in the blank: A _____ fulfills the requests of its clients by forwarding them to other servers 1 / 1 point
- ☐ firewall
- ☒ proxy server
- ☐ virtual private network (VPN)
- ☐ router
- Correct
10. How do forward proxy servers secure internal networks? Select two answers. 1 / 1 point
- ☒ They receive outgoing traffic from an employee, approve it, then forward it to its destination on the internet.
- Correct
- ☐ They are useful for protecting internal web servers that contain confidential data.
- ☐ Both forward and reverse proxy servers add a layer of protection from the internet.
- ☐ They hide a user's IP address and approve all outgoing requests.
- Correct
