Role Play

✚

Alexandra Chen

Hi everyone! I'm Alexandra Chen, CTO at TechCorp Solutions. Thank you for coming in today to present your cloud transformation strategy. We're looking to address some critical pain points, and I'm keen to understand how your proposed \$2M investment will deliver clear value. Please, walk me through your comprehensive vision for this transformation. I'm particularly interested in how the different components will integrate to support our business goals.

Alexandra Chen has left. The Role Play activity has ended.

Feedback session

You faced that challenge head-on! Here is a summary of my notes:

Areas for improvement:

Task 1: Task 1: Unified Architecture Overview Present the complete solution architecture showing how serverless, analytics, and hybrid components integrate to support TechCorp's three business units. I did not find evidence of you presenting a complete solution architecture showing how serverless, analytics, and hybrid components integrate to support TechCorp's three business units.

Task 2: Task 2: Serverless Application Platform Detail the serverless architecture for customer-facing applications, including API management, compute scaling, and event-driven workflows. I did not find evidence of you detailing the serverless architecture for customer-facing applications, including API management, compute scaling, and event-driven workflows.

Task 3: Task 3: Data Analytics Pipeline Explain the end-to-end data processing solution from ingestion through visualization, demonstrating real-time and batch processing capabilities. I did not find evidence of you explaining the end-to-end data processing solution from ingestion through visualization, demonstrating real-time and batch processing capabilities.

Task 4: Task 4: Enterprise Integration Strategy Address how the hybrid approach connects existing on-premises systems with cloud services while maintaining security and compliance. I did not find evidence of you addressing how the hybrid approach connects existing on-premises systems with cloud services while maintaining security and compliance.

Task 5: Task 5: Implementation Roadmap & Risk Management Present a phased implementation approach that minimizes business disruption while delivering incremental value. I did not find evidence of you presenting a phased implementation approach that minimizes business disruption while delivering incremental value.

Give voice that a try
