You're getting there! Review your feedback before trying again.

Fantastic work showing strong understanding of risk, rogue devices, asset types, and asset classification in security contexts—your foundation is really solid! Keep exploring your personalized feedback to deepen and extend these strengths even further.

1. What is a risk?

1 / 1 point

- ☒ Anything that can impact the confidentiality, integrity, or availability of an asset
- ☐ A weakness that can be exploited by a threat
- ☐ Any circumstance or event that can negatively impact assets
- ☐ The practice of labeling assets based on sensitivity and importance to an organization

Nice work

2. A security professional discovers a rogue access point on their company WIFI that is not managed by the networking team. The rogue device is altering and deleting sensitive records without authorization. What is the rogue device in this scenario?

1 / 1 point

- ☐ Asset
- ☐ Risk
- ☒ Threat
- ☐ Vulnerability

Nice work

3. A product team is storing customer survey data for a new project in a cloud drive. The data is only accessible to product team members while the project is in development. What is this data's asset type?

1 / 1 point

- ☐ Customer data
- ☒ Confidential
- ☐ Internal demo
- ☐ Public

Nice work

4. What is the practice of labeling assets based on sensitivity and importance to an organization?

1 / 1 point

- ☒ Asset classification
- ☐ Asset restriction
- ☐ Asset management
- ☐ Asset inventory

Nice work
