

A top-down Taxonomy with Examples

150 ways to evaluate a firm's performance, broken down by dimension and method.

Dimension	Method	Count
Financial	Return on Investment (ROI)	10
Financial	Return on Assets (ROA)	10
Financial	Return on Equity (ROE)	10
Financial	Profit Margin	10
Financial	Operating Margin	10
Financial	Net Income	10
Financial	Revenue	10
Financial	Assets	10
Financial	Equity	10
Financial	Debt	10
Financial	Capital Structure	10
Financial	Cost of Capital	10
Financial	Dividend Yield	10
Financial	Market Value	10
Financial	Share Price	10
Financial	Volatility	10
Financial	Beta	10
Financial	Correlation	10
Financial	Standard Deviation	10
Financial	Sharpe Ratio	10
Financial	Sortino Ratio	10
Financial	Information Ratio	10
Financial	Tracking Error	10
Financial	Alpha	10
Financial	Risk-Adjusted Return	10
Financial	Value at Risk (VaR)	10
Financial	Expected Shortfall (ES)	10
Financial	Conditional VaR (CVaR)	10
Financial	Stress Test	10
Financial	Scenario Analysis	10
Financial	Monte Carlo Simulation	10
Financial	Historical Simulation	10
Financial	Parametric VaR	10
Financial	Non-Parametric VaR	10
Financial	Empirical VaR	10
Financial	Bootstrap VaR	10
Financial	Filter Rule	10
Financial	Technical Analysis	10
Financial	Fundamental Analysis	10
Financial	Quantitative Analysis	10
Financial	Qualitative Analysis	10
Financial	Hybrid Analysis	10
Financial	Machine Learning	10
Financial	Artificial Intelligence	10
Financial	Blockchain	10
Financial	Cloud Computing	10
Financial	Big Data	10
Financial	Internet of Things (IoT)	10
Financial	Augmented Reality (AR)	10
Financial	Virtual Reality (VR)	10
Financial	Robotics	10
Financial	Autonomous Vehicles	10
Financial	Artificial Intelligence (AI)	10
Financial	Machine Learning (ML)	10
Financial	Deep Learning	10
Financial	Reinforcement Learning	10
Financial	Generative Adversarial Networks (GANs)	10
Financial	Convolutional Neural Networks (CNNs)	10
Financial	Recurrent Neural Networks (RNNs)	10
Financial	Long Short-Term Memory (LSTM)	10
Financial	Autoencoders	10
Financial	Variational Autoencoders (VAEs)	10
Financial	Generative Models	10
Financial	Discriminative Models	10
Financial	Hybrid Models	10
Financial	Ensemble Models	10
Financial	Boosting	10
Financial	Bagging	10
Financial	Random Forests	10
Financial	Support Vector Machines (SVMs)	10
Financial	Linear Models	10
Financial	Logistic Regression	10
Financial	Decision Trees	10
Financial	Naive Bayes	10
Financial	K-Nearest Neighbors (K-NN)	10
Financial	Support Vector Regression (SVR)	10
Financial	Linear Regression	10
Financial	Polynomial Regression	10
Financial	Bayesian Regression	10
Financial	Bayesian Networks	10
Financial	Markov Decision Processes (MDPs)	10
Financial	Dynamic Programming	10
Financial	Reinforcement Learning (RL)	10
Financial	Deep Reinforcement Learning	10
Financial	Multi-Armed Bandits	10
Financial	Contextual Bandits	10
Financial	Thompson Sampling	10
Financial	Upper Confidence Bound (UCB)	10
Financial	Bayesian Bandits	10
Financial	Linear Bandits	10
Financial	Neural Bandits	10
Financial	Deep Bandits	10
Financial	Reinforcement Learning (RL)	10
Financial	Deep Reinforcement Learning	10
Financial	Multi-Armed Bandits	10
Financial	Contextual Bandits	10
Financial	Thompson Sampling	10
Financial	Upper Confidence Bound (UCB)	10
Financial	Bayesian Bandits	10
Financial	Linear Bandits	10
Financial	Neural Bandits	10
Financial	Deep Bandits	10
Financial	Reinforcement Learning (RL)	10
Financial	Deep Reinforcement Learning	10
Financial	Multi-Armed Bandits	10
Financial	Contextual Bandits	10
Financial	Thompson Sampling	10
Financial	Upper Confidence Bound (UCB)	10
Financial	Bayesian Bandits	10
Financial	Linear Bandits	10
Financial	Neural Bandits	10
Financial	Deep Bandits	10
Financial	Reinforcement Learning (RL)	10
Financial	Deep Reinforcement Learning	10
Financial	Multi-Armed Bandits	10
Financial	Contextual Bandits	10
Financial	Thompson Sampling	10
Financial	Upper Confidence Bound (UCB)	10
Financial	Bayesian Bandits	10
Financial	Linear Bandits	10
