Build with AI: Measurement plan

We recommend signing into Gemini with your Google account so you can use additional features and save your Gemini activity.

As you follow the video instructions in this lab, customize the prompts below to fit your own work.

Feel free to pause the video as needed.

Lab tasks:

Step 1: Identify key presentation metrics

Click the "New chat" button to start a new chat with Gemini. Then, paste the prompt below and replace the text in [brackets] with your own details.

I work at an [your company type, e.g. apparel company]. I'm preparing for an [type of meeting, e.g. executive review of website performance]. Our goal is to [primary business goal, e.g. increase revenue in Q3]. What are the top 5 metrics I should consider for my presentation?

Review Gemini's suggestions. You will use one of these metrics for the next step.

Step 2: Anticipate leadership questions

In the same chat with Gemini, paste the prompt below and replace the text in [brackets] with your own details.

What questions might our leadership team ask about [one of Gemini's suggested metrics from the previous step]?

Read the potential questions Gemini suggests. As a next step, you can ask Gemini for guidance on how to find the data for your chosen metric.

Optional: Get data from a specific data source

If you know where to get your data but aren't sure how to download it, you can prompt Gemini for help. Paste the prompt below and replace the text in [brackets] with your own details.

How do I export [data, e.g. website traffic data] from [data source, e.g. Google Analytics] so I can analyze it in [destination, e.g. a Google Sheet]?

From there, you can follow the directions in Gemini's output.

Next steps:

Whenever you need some help in figuring out which metrics to focus on in your data, try asking Gemini for some advice. You can provide it context on the people you communicate with regularly, and anticipate what questions they might have about your data.

When you are satisfied with your outputs from this lab, you can close this page and return to the main screen of this cert.
