

Module 1

Discover vite coding

AI for app building

Video • 8 min

Amman, what's vite coding?

Video • 31 min

Module 2

Learn how to vite code

Learn how to build a custom AI tool

Video • 4 min

Develop functional app to handle manual tasks

Reading • 2 min

Build with AI: Tie breaker app for better decision making

Lab • 12 min

Build with AI: Brand builder app to visualize any product

Lab • 12 min

Build with AI: Interactive dashboard to uncover data insights

Lab • 12 min

Module 3

Create your app using AI Studio

Identify tasks for your app

Reading • 2 min

Evaluate your workflow to build an app

Reading • 1 min

Amman, what's your prep for building app?

Video • 1 min

Build with AI: Custom app to help you at work

Lab • 12 min

Amman, can AI models be combined?

Video • 30 min

Measure the impact of your app

Reading • 2 min

Course challenge

Graded assignment • 10 min

Claim your course completion badge

Reading • 1 min

Resources for Google AI Professional Certificate

grayscale

Reading • 2 min

End of course survey

Ungraded assignment • 12 min

Develop functional apps to handle manual tasks

0:00 / 2:00

In the upcoming labs, Amman from Google AI Studio will introduce you to vite coding. You'll learn how to use AI Studio to turn ideas into functional apps using natural language. This lets AI handle writing the code so you can focus on creating unique solutions to your workplace challenges.

What you'll gain:

- Vite coding experience:** Learn how to go from a rough idea to a working app in minutes without writing a line of code.
- Confidence troubleshooting:** Partner with AI to identify and fix bugs quickly.
- Inspiration to build your own apps:** Discover new ways to tackle recurring work challenges and get inspired to make your own apps.

Apply what you learn:

In the labs, Amman will demonstrate how to build three different apps: a tie-breaker app to help you make difficult decisions, a brand builder app to help you prototype marketing assets, and an interactive dashboard to help you better understand, explore, and make informed decisions with your data. As you follow along, think about where these apps could provide value in your day-to-day work.

Let's start building!
