1. Which of the following best reflects how the Project Manager (PM) and Business Analyst (BA) work together to ensure project success? 1 / 1 point
- ☐ The PM focuses on managing project delivery and the BA ensures business needs and requirements are fully met.
 - ☐ The BA directs the development team and the PM performs stakeholder analysis.
 - ☐ The PM and BA share the same responsibilities and often duplicate efforts.
 - ☐ The PM determines system functionality and the BA manages budgets and procurement.
 - ☒ Correct
PMs manage scope, schedule, and resources; BAs ensure the solution delivers value to the organization.
2. At the initiation stage of a predictive project, what is a primary contribution of the Business Analyst (BA)? 1 / 1 point
- ☐ The BA develops the detailed work schedule and assigns technical resources.
 - ☒ The BA identifies business problems, opportunities, and high-level requirements to confirm project alignment with strategy.
 - ☐ The BA authorizes project funding and issues the project charter.
 - ☐ The BA finalizes lessons learned and archives all documentation.
 - ☒ Correct
This ensures the project supports organizational goals and provides a solid foundation for planning.
3. During the Planning process group, how might a non-project manager actively participate? 1 / 1 point
- ☒ By contributing subject-matter expertise, defining requirements, or leading portions of the Work Breakdown Structure (WBS).
 - ☐ By approving the project charter and assigning funding sources.
 - ☐ By closing vendor contracts and releasing project resources.
 - ☐ By authorizing final deliverable acceptance.
 - ☒ Correct
Non-PMs can take ownership of specific deliverables or activities and directly support planning outcomes.
4. In the Salience Model, which type of stakeholder combines power and legitimacy but lacks urgency, often influencing direction without requiring immediate action? 1 / 1 point
- ☐ Dominant Stakeholder
 - ☐ Dependent Stakeholder
 - ☐ Definitive Stakeholder
 - ☐ Dormant Stakeholder
 - ☒ Correct
Dormant stakeholders have authority (power) and rightful involvement (legitimacy) but no pressing time-sensitive concerns. They should be kept satisfied and informed of key decisions.
5. Why is it important to continuously monitor and update a Stakeholder Engagement Plan during project execution? 1 / 1 point
- ☐ Because the plan must be re-approved by the sponsor every month.
 - ☐ Because the plan automatically updates through the communications system.
 - ☒ Because stakeholder priorities, influence, and expectations can shift as the project evolves.
 - ☐ Because once stakeholders are engaged, their needs remain constant.
 - ☒ Correct
Ongoing monitoring ensures engagement strategies remain aligned with current conditions, preventing disengagement or resistance.
6. Which interpersonal skill best supports collaboration and trust-building during the Executing process group? 1 / 1 point
- ☐ Change request approval
 - ☒ Active listening
 - ☐ Budget reconciliation
 - ☐ Procurement analysis
 - ☒ Correct
Active listening helps clarify understanding, resolve conflicts early, and strengthen relationships across the team and stakeholders.
7. How can Generative AI support Business Analysts and Project Managers during stakeholder interviews? 1 / 1 point
- ☒ By analyzing stakeholder responses in real time to identify patterns, gaps, and emerging requirements.
 - ☐ By approving all requirements automatically once interviews conclude.
 - ☐ By finalizing the communications plan for the next phase.
 - ☐ By assigning roles and responsibilities to each participant.
 - ☒ Correct
AI tools can summarize key insights, detect recurring themes, and suggest clarifying questions for follow-up.
8. What is a key benefit of integrating AI during the documentation phase of requirements elicitation? 1 / 1 point
- ☒ It helps organize raw stakeholder input into structured categories and detects missing information.
 - ☐ It eliminates the need for manual data entry or oversight.
 - ☐ It replaces the need for stakeholder validation sessions.
 - ☐ It automatically assigns budget estimates to each requirement.
 - ☒ Correct
AI can summarize meeting notes, highlight trends, and suggest updates for clarity and completeness.
9. Which of the following represents a key ethical risk when applying Generative AI in project management? 1 / 1 point
- ☐ Limiting project documentation to AI-generated outputs only.
 - ☐ Automating all stakeholder communication through AI chatbots.
 - ☐ Allowing all project team members unrestricted AI access.
 - ☒ Using stakeholder data without explicit consent or proper data security measures.
 - ☒ Correct
Data privacy and ethical handling of sensitive information are critical to maintaining trust and compliance.
10. How does a Kanban Board enhance team collaboration and efficiency during project execution? 1 / 1 point
- ☒ By making workflow progress visible, limiting work in progress, and encouraging continuous improvement.
 - ☐ By displaying start and finish dates for every project activity.
 - ☐ By assigning cost categories and managing project budgets.
 - ☐ By tracking milestones and summarizing only key accomplishments.
 - ☒ Correct
Kanban promotes transparency and helps teams balance workload, identify bottlenecks, and improve delivery flow.
