1. What is the primary goal of the requirements elicitation process?

1 / 1 point

- ☒ To gather, clarify, and document stakeholder needs to define what the project must deliver
- ☐ To allocate resources and create the project schedule
- ☐ To create the stakeholder register
- ☐ To verify whether project risks have been mitigated

☒ **Correct**

Elicitation ensures that project outputs align with real business needs and stakeholder expectations.

2. Which of the following best describes functional requirements?

1 / 1 point

- ☐ They specify performance, security, or usability expectations.
- ☒ They define what the system or process should do to meet business and stakeholder needs.
- ☐ They identify industry compliance standards.
- ☐ They document transition steps needed for implementation.

☒ **Correct**

Functional requirements describe features and behaviors such as processing payments or generating reports.

3. Which of the following describes a non-functional requirement?

1 / 1 point

- ☐ The system must provide user login functionality.
- ☐ The user must be able to reset passwords.
- ☐ The organization must follow data privacy regulations.
- ☒ The system must load a report within five seconds of user input.

☒ **Correct**

Non-functional requirements define quality attributes such as performance, speed, or reliability.

4. According to the Business Analysis Body of Knowledge (BABOK®) model, which step comes first in the elicitation process?

1 / 1 point

- ☐ Communicate results to the project sponsor
- ☐ Manage stakeholder collaboration
- ☒ Prepare for elicitation by identifying stakeholders, methods, and goals
- ☐ Conduct interviews with stakeholders

☒ **Correct**

Preparation ensures the analyst selects the right stakeholders and techniques for success.

5. Why is it important for non-project managers to participate in requirements elicitation?

1 / 1 point

- ☐ They finalize business cases
- ☐ They approve the project charter
- ☒ They provide operational insights that ensure requirements reflect real business processes
- ☐ They complete technical specifications

☒ **Correct**

Non-Project Managers offer firsthand knowledge of daily workflows, helping validate practical requirements.

6. What is the main purpose of requirements prioritization?

1 / 1 point

- ☐ To finalize cost estimates
- ☒ To determine which requirements provide the greatest value and should be implemented first
- ☐ To remove unapproved requirements
- ☐ To assign owners for each requirement

☒ **Correct**

Prioritization helps teams focus resources on what delivers maximum stakeholder and business impact.

7. How can Generative Artificial Intelligence (AI) assist during the preparation phase of requirements elicitation?

1 / 1 point

- ☐ By conducting stakeholder interviews automatically
- ☐ By scheduling team meetings
- ☐ By validating requirements after project closure
- ☒ By generating stakeholder lists, drafting interview guides, and suggesting elicitation techniques

☒ **Correct**

Artificial Intelligence helps Business Analysts and Project Managers plan efficiently by automating preparation tasks and ensuring coverage of key perspectives.
