Gemini

Hi MaHi
Where should we start?

0:24 / 4:07

If the Gemini app fails to load, navigate to the URL, log in your browser and manually enter [access token](#).

Apply the prompting framework in Gemini

We recommend signing into Gemini with your Google Account so you can use additional features and save your Gemini activity.

As you follow the video instructions in this lab, customize the prompts below to fit your own work.

Feel free to pause the video as needed.

Lab tasks:

Step 1: Define your initial task

Click the "New chat" button to start a new chat with Gemini. Then, paste the prompt below and replace the text in [brackets] with your own details.

I want to learn a new skill to [your high-level goal], e.g. advance my career, get a new job; but I'm not sure where to start. Help me brainstorm some ideas.

Review Gemini's suggestions. You will refine these results in the next step.

Step 2: Use meta-prompting to refine the results

In the same chat with Gemini, paste the prompt below to ask Gemini how to improve its own suggestions.

What questions can I answer to help you tailor your suggestions?

Read Gemini's questions. You will use them to provide more context in the next step.

Step 3: Add context about yourself

In the same chat with Gemini, answer the questions from the previous step to provide additional context. Paste the prompt below and replace the text in [brackets] with your own details.

Here are some more details about me:

- [Answer 1]
- [Answer 2]
- [Answer 3]
- [Answer 4]

Based on this information, suggest [number, e.g. three] skills that would be relevant to me.

Step 4: Define a persona

In the same chat, ask Gemini to adopt a specific persona to help analyze the previous suggestions. Paste the prompt below and replace the text in [brackets].

Now, act as a [specific persona, e.g. career coach or hiring manager]. Which of the skills above would you recommend I focus on first? Explain your reasoning.

Step 5: Decide on next steps

In the same chat with Gemini, paste the prompt below and replace the text in [brackets].

Suggest [number, e.g. three] actions I can take [timeframe, e.g. this week] to start learning that skill. Format this as a [output format, e.g. table] with [format details, e.g. column names].

Next steps:

Think about what next steps you'd like to take based on Gemini's output. Also, consider how you can use the prompting framework in other ways.

When you are satisfied with your outputs from this lab, you can close this page and return to the main screen of this course.

Mark as completed
