

Recommend a high availability solution for compute

Objectives:

At the end of this episode, I will be able to:

Understand what recommending a solution for high availability of compute resources in Azure is and why it is important.

Explain the basic concepts associated with recommending a solution for high availability of compute resources in Azure.

Identify the reasons why an organization needs to recommend a solution for high availability of compute resources in Azure.

Define how to recommend a solution for high availability of compute resources in Azure.
