

Solution for non-relational data storage

Objectives:

At the end of this episode, I will be able to:

Understand what recommending a solution for high availability of non-relational data storage resources in Azure is and why it is important.

Explain the basic concepts associated with recommending a solution for high availability of non-relational data storage resources in Azure.

Identify the reasons why an organization needs to recommend a solution for high availability of non-relational data storage resources in Azure.

Define how to recommend a solution for high availability of non-relational data storage resources in Azure.
