

Optimize network performance for applications

Objectives:

At the end of this episode, I will be able to:

Understand what recommending a connectivity solution that optimizes network performance for applications in Azure is and why it is important.

Explain the basic concepts associated with recommending a connectivity solution that optimizes network performance for applications in Azure.

Identify the reasons why an organization needs to recommend a connectivity solution that optimizes network performance for applications in Azure.

Define how to recommend a connectivity solution that optimizes network performance for applications in Azure.
