

Mastering Advanced Azure Architecture

A deep-dive into high availability, scalability, and migration strategies.

Current State

- IT Professionals & Cloud Engineers
- Solution Architects
- Possess foundational Azure knowledge

The Output

- Design highly available, fault-tolerant solutions
- Direct readiness for the AZ-305 Specialization

Four pillars of advanced cloud capability

High-Availability Design

Engineer fault-tolerant solutions for compute, storage, and networking components.

Application Architecture

Implement efficient architectures utilizing advanced caching, messaging, and API integrations.

Data Migration

Evaluate and execute secure migration strategies for databases and unstructured data.

Network & Security

Optimize network performance and secure scalable, robust cloud environments.

A sequenced roadmap to architectural mastery

Establishing the infrastructure foundation

Module 1: High Availability (2 hrs)

Identify availability requirements and design fault tolerance across compute, storage, and network layers.

Module 2: Compute Solutions (2 hrs)

Evaluate container-based vs. serverless computing, and architect solutions for relational and non-relational storage.

Architecting efficient, event-driven applications

Module 3 Focus (2 hrs):

- Implement advanced caching
- Design messaging architectures
- Execute API integrations
- Automate deployment pipelines

Executing seamless on-premises to cloud migrations

Module 4 (2 hrs): Evaluate and migrate servers, applications, databases, and unstructured data leveraging the **Cloud Adoption Framework**.

Securing and optimizing the underlying network

4-Hour Time Investment

Module 5

- Optimize network performance
- Design scalable routing
- Architect robust security measures

The comprehensive architect's capability matrix

Infrastructure Layer	Application Design	Strategic Architecture
Cloud Computing	Event-Driven Programming	Solution Architecture
Virtual Networking	Serverless Computing	Enterprise Architecture
Virtual Machines	Application Deployment	Data Migration
Cloud Infrastructure	API Integration	Cloud Platforms
Hybrid Cloud Computing	Application Design	Cloud Deployment

An interactive, AI-enhanced learning environment

Coursera Coach (Updated May 2025)

Interactive, real-time AI conversations to test knowledge, challenge assumptions, and deepen understanding.

Built for Professionals

Flexible 10-hour/week pacing designed to fit alongside full-time roles.

Global Reach

Course content available with translations in 10 different languages.

A strategic step toward official certification

Enrolling automatically begins progress toward the highly recognized AZ-305 industry credential.

Enrolling automatically begins progress toward the highly recognized AZ-305 industry credential.

Proven ROI for enterprise teams and individuals

“

I directly applied the concepts and skills I learned from my courses to an exciting new project at work.

— Jennifer J. (Learner since 2020)

”

“

To be able to take courses at my own pace and rhythm has been an amazing experience.

— Felipe M. (Learner since 2018)

”

Over 4,700 global companies choose Coursera for Business to master in-demand skills.

Synthesizing the complete cloud architect

Mastering Azure is about harmonizing compute, network, and data into a single, resilient architecture.
