1. What is the primary role of the Business Analyst (BA) during the pre-initiation phase of a project? 1 / 1 point
- ☐ To identify business needs, assess the current and future states, and develop a business case for executive review
 - ☐ To approve the Project Charter and authorize the project to proceed
 - ☐ To manage procurement and vendor selection for solution delivery
 - ☐ To assign resources and develop the detailed project schedule
- Correct
The Business Analyst leads early analysis activities, defining the problem or opportunity, documenting the current and future states, and assembling a high-level business case that guides project approval.
2. What is the primary purpose of a Responsibility Assignment Matrix (RACI Matrix)? 1 / 1 point
- ☐ To estimate project costs and assign budget categories
 - ☐ To document the communication preferences of each stakeholder
 - ☐ To track project risks and assign mitigation strategies
 - ☒ To clarify roles and responsibilities by identifying who is Responsible, Accountable, Consulted, and Informed for each task or deliverable
- Correct
The Responsibility Assignment Matrix ensures a clear understanding of ownership, accountability, and communication for project or operational activities.
3. Why should a Stakeholder Register include a version number and date? 1 / 1 point
- ☐ Because the project manager must submit it weekly for executive review
 - ☐ Because each stakeholder must approve their entry before the project starts
 - ☒ Because the document evolves as the project progresses and must reflect the most current stakeholder information
 - ☐ Because version numbers are required for all financial reporting documents
- Correct
The Stakeholder Register is a living document that changes as stakeholders are added, removed, or reassigned. Version control ensures everyone is working from the latest, most accurate version.
4. In the Sallience Model, which type of stakeholder holds power, legitimacy, and urgency and requires the highest level of engagement? 1 / 1 point
- ☐ Dominant Stakeholder
 - ☐ Dormant Stakeholder
 - ☒ Definitive Stakeholder
 - ☐ Dangerous Stakeholder
- Correct
Definitive stakeholders possess all three attributes—power, legitimacy, and urgency—and therefore must be engaged as top priorities through frequent communication and active involvement in decisions.
5. Which statement best explains why the Stakeholder Engagement Plan should be reviewed and updated regularly? 1 / 1 point
- ☒ Because stakeholder power, interest, and commitment levels can change throughout the project lifecycle
 - ☐ Because it must be submitted to each stakeholder for validation
 - ☐ Because it replaces the Stakeholder Register and Communications Plan over time
 - ☐ Because project budgets and schedules are managed through this plan
- Correct
Stakeholder dynamics evolve as projects progress; regularly updating the plan ensures engagement strategies remain effective and aligned with current realities.
6. Which of the following is an interpersonal skill identified by the Project Management Institute (PMI) as essential to success during the Executing Phase? 1 / 1 point
- ☐ Cost estimating
 - ☐ Procurement closure
 - ☒ Conflict management
 - ☐ Requirements elicitation
- Correct
Conflict management is one of the 11 interpersonal skills defined by the Project Management Institute, crucial for maintaining team cohesion and progress during execution.
7. Why is version control important in a Communications Management Plan? 1 / 1 point
- ☐ Because it ensures the same file name is used for every update
 - ☐ Because the plan should never change once approved
 - ☒ Because communication needs and stakeholders often change, requiring updates to keep the plan current
 - ☐ Because it eliminates the need to notify stakeholders about changes
- Correct
Version control ensures the plan reflects the most up-to-date information and communication requirements as the project evolves.
