1. Which of the following best describes the complementary roles of the Project Manager (PM) and Business Analyst (BA)?

1 / 1 point

- ☐ The Project Manager and Business Analyst operate independently, with no overlap in roles.
- ☐ The Business Analyst manages team resources while the Project Manager validates deliverables.
- ☐ The Project Manager defines all requirements while the Business Analyst approves the Project Charter.
- ☐ The Project Manager ensures successful project delivery, while the Business Analyst ensures the right solution is delivered.

☒ Correct
Project Managers focus on scope, schedule, and resources, while Business Analysts ensure requirements and solutions meet business needs.

2. During the initiation stage of predictive project management, what role does the Business Analyst typically perform?

1 / 1 point

- ☐ The Business Analyst formally authorizes the project through the charter.
- ☐ The Business Analyst develops the project schedule and assigns resources.
- ☐ The Business Analyst conducts a needs assessment to identify business needs, opportunities, and high-level requirements.
- ☐ The Business Analyst closes the project by documenting lessons learned.

☒ Correct
This work ensures the project aligns with strategic goals, complementing the Project Manager's responsibilities.

3. During the Planning process group, how might a non-project manager be directly involved?

1 / 1 point

- ☐ By listing resources and defining resources.
- ☐ By authorizing the Project Charter and approving funding.
- ☐ By serving as a core team member and supporting requirements definition.
- ☐ By approving deliverables in their final form.

☒ Correct
Non-project managers may take ownership of tasks or deliverables, effectively acting as the Project Manager for that portion of work.

4. Which of the following best describes non-project manager involvement during the Executing process group?

1 / 1 point

- ☐ Completing assigned tasks and leading deliverables.
- ☐ Documenting lessons learned and transitioning deliverables to operations.
- ☐ Tracking project performance and managing changes.
- ☐ Authorizing stakeholder sign-off on the Project Charter.

☒ Correct
Non-project managers contribute leadership and oversight, ensuring deliverables meet expectations.

5. How might a non-project manager contribute to requirements elicitation and documentation?

1 / 1 point

- ☐ By authorizing the Project Charter and approving its funding.
- ☐ By creating the Requirements Traceability Matrix (RTM) without stakeholder input.
- ☐ By performing contract audits to verify vendor performance.
- ☐ By serving as a subject matter expert or sharing user needs.

☒ Correct
Non-project managers often provide critical operational knowledge that shapes clear, feasible requirements.

6. In the post-ssn "What's the Value?", why does the Product Owner emphasize the IC method when working with the Operations Manager?

1 / 1 point

- ☐ Because the IC method helps the team collaborate effectively before adding stories to the backlog.
- ☐ Because User Stories need writing, clarification, and agreement to ensure clarity and customer alignment.
- ☐ Because the IC method guarantees budget approval from executives.
- ☐ Because the IC method is used to assign development tasks during the Sprint.

☒ Correct
This ensures User Stories are clear, testable, and aligned with customer needs.

7. Which focus artifact represents a living, prioritized list of everything the team might build?

1 / 1 point

- ☐ Sprint Backlog
- ☐ Increment
- ☐ Product Charter
- ☐ Product Backlog

☒ Correct
The Product Backlog is owned by the Product Owner and refined with stakeholder input to ensure ongoing alignment with priorities.
