Practice Quiz: The Non-Project Manager in an Adaptive/Agile Environment

Practice Quiz: The Non-Project Manager in an Adaptive/Agile Environment

Due Mar 25, 11:59 PM EDT

Your grade: 100%

Scored: 200% • Your highest: 100% • To pass you need at least 60%. We keep your highest score.

Next item →

1. What is the main function of the Sprint Retrospective?

2 / 1 point

☐ To evaluate the Sprint and identify improvements for the next one

☐ To demonstrate the product increment to stakeholders and gather feedback

☐ To plan the next Sprint backlog items and finalize the Sprint Goal

☐ To agree on the project funding and authorize release to customers

☒ Correct

The Sprint Retrospective is about continuous improvement, focusing on processes and collaboration rather than deliverables.

2. During Sprint Planning, how can non-project managers add the most value?

2 / 1 point

☐ By approving the final budget for the project and signing off on funding

☐ By writing feature details into the Sprint increment

☐ By user stories, prioritizing the backlog, and validating goals.

☐ By writing and enforcing the Definition of Done for the Scrum Team

☒ Correct

non-project managers provide essential business, customer, and operational input, ensuring that backlog items and Sprint Goals reflect real-world value.

3. Which of the following best describes the purpose of creating personas in Agile projects?

2 / 1 point

☐ To create realistic profiles clarifying needs, behaviors, and goals for accurate requirements

☐ To assign roles and responsibilities to Scrum Team members during a Sprint

☐ To replace customer interviews so that no direct customer interaction is needed

☐ To provide acceptance criteria for Sprint completion

☒ Correct

Personas include demographics, interests, objectives, and product usage details. They guide backlog refinement by ensuring requirements are user-centered.

4. What is the best description of the Three C (3C) method for User Stories discussed in the podcast "What's the Value?"

2 / 1 point

☐ The 3C method refers to Context, Communication, and Completion, describing team behaviors during Sprint execution.

☐ The 3C method requires Customer, Cost, and Completion date for each User Story.

☐ The 3C method: Context, Communication, Confirmation, defines, clarifies, and validates User Stories before backlog entry.

☐ The 3C method means Create, Code, and Check, describing how developers work on stories during a Sprint.

☒ Correct

This ensures User Stories are clear, testable, and valuable, with active stakeholder involvement.

5. According to the non-project manager's Agile Cheat Sheet, where should non-project managers play the most critical role during a Sprint Review?

2 / 1 point

☐ By reviewing the product, giving feedback, and highlighting gaps or risks

☐ By writing technical test cases for the development team to use in the next Sprint

☐ By prioritizing backlog items for the next Sprint without Product Owner involvement

☐ By facilitating the Retrospective and suggesting team process changes

☒ Correct

The Sprint Review depends on stakeholder feedback to refine the backlog and ensure delivered value meets real needs.
