

Task 2B: Data Warehouse Implementation Report

File Name: Part 2_Task 2B.pdf

- **Architecture Strategy:** I utilized a **Star Schema** to reduce join complexity, enabling faster generation of medical and financial reports.
- **Data Integrity:** By normalizing the OLTP side to **3NF**, we ensured that patient and billing data are consistent and audit-ready.
- **Compliance & Scalability:** The design supports **HIPAA/GDPR** by centralizing sensitive data and allows for future scaling into **Data Lakes** for unstructured medical records.
