1. AWS Lake Formation has a set of suggested personas and AWS Identity and Access Management (IAM) permissions. Which is a required persona?

1 / 1 point

- ☒ Data lake administrator
- ☐ Data engineer
- ☐ Data analyst
- ☐ Business analyst

Correct

The **Data lake administrator** is required. The Data lake administrator is a user who can register Amazon S3 locations, access the Data Catalog, create databases, create and run workflows, grant Lake Formation permissions to other users, and view AWS CloudTrail logs. The user has less IAM permissions than the IAM administrator but enough to administer the data lake. They cannot add other data lake administrators.

2. Which one of the following is the best description of the capabilities of Amazon QuickSight?

1 / 1 point

- ☐ Automated configuration service built on AWS Glue
- ☒ Scalable, serverless business intelligence service
- ☐ Fast, simple, cost-effective data warehousing
- ☐ Simple, scalable, and serverless data integration

Correct

Amazon QuickSight is a scalable, serverless, embeddable, machine learning-powered BI service built for the cloud.
